Profile

Results-driven Angular Developer with over 2 years of experience in designing and implementing scalable and efficient frontend solutions. Specialized in leveraging Angular to create dynamic and user-friendly web applications, ensuring high performance, security, and seamless integration with backend systems. Proven track record in collaborating with cross-functional teams to deliver high-quality software that meets client requirements and exceeds expectations.

Professional Experience

Full Stack Developer | Angular and Dotnet, *Marcator* 🔗   04/2024 – present
Abuja, Nigeria
- At Marcator Technology, I am working as a Full Stack Developer specializing in Angular and .NET.
- I contribute to the development of QueensVault, an application designed for customers to save money and earn interest while their funds are utilized for business ventures. The platform also supports recurring savings from customers' bank accounts to QueensVault.
- This role allowed me to enhance my skills in building robust, customer-focused financial applications.
- Implemented Inter and Intra Transfer, withdrawal and deposit and many other features on the admin dashboard of the site using angular.

Angular Developer, *Stackbuld* 🔗   03/2024 – present
Lagos, Nigeria
- At Stackbuld, I work as an Angular developer, designing and implementing various features for diverse customers as part of our software consultancy services.
- Successfully developed admin portal for an ecommerce application in a team of 6.
- Achieved 98% customer satisfaction on the user side of the application by fixing most of the issue they had while using the application.
- Configured angular material team to follow our client brand colors.
- Improved security by making sure all the user input is well validated to mitigate XSS attack.

Full-Stack Software Engineer, *Tenece Professional Services*   05/2023 – 02/2024
Enugu, Nigeria
- My team collaborated closely with company partners to gather requirements, ensuring software solutions met specific needs and were delivered on schedule.
- We have engineered a range of RESTful APIs using .NET Core, streamlining data exchange between front-end and back-end systems.
- We maintained and updated legacy systems, ensuring continuous compatibility and minimizing system downtime.
- We also conducted comprehensive unit/integration testing using Xunit for .NET and Jasmine for angular ensuring software reliability and functionality.

Full-stack Software Engineer, *WICRYPT*   05/2023 – 08/2023
Enugu, Nigeria
- Advanced in knowledge by participating in building and deploying .Net and Angular applications.
- Developed secure software systems using C#, ASP.NET, and Angular.
- Improved system efficiency and user experience with robust applications.

- Worked closely with my team to Manage and optimize systems on AWS for best performance and security.
- Increased user engagement through interactive web UIs with Angular.
- Collaborated in agile projects for timely delivery of project goals.
- Adapted to emerging technologies and industry trends.

Software Engineer Intern, *Genesys Tech Hub*   11/2022 – 05/2023
                                                                   Enugu, Nigeria
- Received comprehensive training in software development with a focus on .NET and Angular technologies.
- Practiced Agile methodologies throughout the software development training life cycle, enhancing my efficiency and productivity to 30%.
- Gained hands-on experience in building, testing, and debugging applications.
- Collaborated with experienced software engineers and developers, gaining invaluable insights into professional software development.
- Participated in regular stand-ups, planning meetings, and retrospectives, further understanding the Agile development process.
- Applied learned concepts and principles in real-world projects, effectively translating academic knowledge into practical skills.

Tech Hub Training Program, *Enugu State Tech Hub*   09/2021 – 07/2022
                                                                   Enugu, Nigeria
- Completed an intensive and comprehensive training program covering web development from concept to deployment.
- Acquired proficiency in front-end technologies including Vanilla JavaScript, Vanilla CSS, and HTML.
- Gained hands-on experience in designing and styling websites using Bootstrap for responsive and user-friendly interfaces.
- Developed dynamic and interactive features using PHP for server-side scripting.
- Collaborated with peers on the development of a fully functional e-commerce site, showcasing end-to-end project management skills.

Projects

Rena Market, *E-commerce* 🔗   03/2024 – present

Hostel Management System | Angular & C#/.NET | AWS Infrastructure 🔗   06/2023 – 08/2023

FUTO School Portals 🔗

UNN School Portal 🔗   08/2023 – 08/2023

See More Projects Here 🔗

Skills

C#/.NET Core | Asp.net Core
AWS | Railway | Render | DevOps | Testing | Microservice

Angular | Angular material
Dependency Injection | Ngrx | Testing | Routing | Security

SSMS | MySql

React | NextJs
Routing | State management(Redux and React Context)

Git
Github | Gitlab

Soft Skills
Communicative, Detail-Oriented, Problem Solving, Empathy , Courage and Humility.

Certificates

Certified C#/.NET and Angular 🔗
Full-Stack Engineer | Genesys Tech Hub

Certified React Developer | Andela 🔗
React | Redux | Testing.

Certified Fronted-end Developer Enugu Tech hub 🔗
Js, Html | Css | B3 | Tailwind

Certificate of participation | Web5 Hackaton 🔗
NextJs & Web5 JS SDK
